Text **GP** to **514-600-5830** to receive a text-based reminder and a link to watch each live episode.

Canada's most innovative livestreaming CME channel is now available for GPs! Launching in February 2016, iMedicus GP is a series of 11 accredited, live and interactive programs. Each live episode will feature an expert panel of two Canadian physicians (one specialist and one GP) presenting the latest therapies and practice guidelines for treating some of the most commonly seen conditions in a busy family practice.

Viewers can watch the live episodes from their computers, tablets, or mobile phones, and interact with the expert panel via e-mail, text, tweet, or chat, and have their questions answered LIVE.

Go to iMedicus.ca on the broadcast dates listed below to watch each program LIVE at 12:00 p.m., 2:00 p.m. and 3:00 p.m. (all EST)*

February 9 **UROLOGY**

Episode Overview

This accredited and interactive episode, specifically designed for family physicians, will focus on the common dermatological conditions of atopic dermatitis, acne vulgaris and herpes labialis. The disease state, treatment options, regimens, treatment optimization and potencies of available medications will be explained using examples of patient cases. Participants will have the opportunity to ask questions and provide comments that will be discussed by the presenting experts throughout the live broadcast.

This episode is part of a live accredited CME web series developed for Canadian family physicians, running from February 9 to May 10, 2016. For more information, visit www.imedicus.ca.

Learning Objectives

Following this program, participants will be able to:

- Review disease pathogenesis of atopic dermatitis, acne vulgaris and herpes labialis
- Better manage individual patients with atopic dermatitis, acne vulgaris and herpes labialis
- Prescribe therapies for treating atopic dermatitis, acne vulgaris and herpes labialis
